razorblade001I HATE IT!!! I HATE IT!!!

First of all i cant play online because of the mods and skins i downlad AND MAkE

Second of all i cant play single player without going online (I have AOL and dial up)

3rd IT JUST IS A WASTE OF VALUBAL SPACE ON MY COMPUTER

I dont even know how to uninstall it, the readme doesnt explain any thing usefull.

Can any one help?

No, nobody can help you. You're a fucking retard. AOL is too easy to use, no wonder fucks like you get online in the first place. Do you know anything about a computer in the first place? Do you know that RG takes up less than a fucking megabyte? Get the fuck off your PC and go buy a Mac, you dumbshit.

I'm glad I'll never see you in any of the RG servers I play in, although I'd like to see you get your head caught in my custom reticle that is allowed just like every other texture.
