On field SBHs like to harvy hide to the AGT, and hide one the side of AGT facing the tib ref or AGT WF cave. and some times, a nod person will distrack the fire of the AGT to allow a SBH to get to AGT from AGT WF cave. Most to all ppl know that SBH like using the Tib Barr back cave to beacon tib or barr, but for those who don't, ya know know.
