put it 5 steps away from the beacon, and fuse for the beacon is 45 secs, the engineers won't respond for 15 secs, so throw your c4 5 secs after you deploy, you distract the engineers long enough, the c4 blows, and beacon hitsfcdrazenwith 50\% chance of my beacon going off everytime i got stealth nuking (keep in mind I will not nuke unless I know it's safe to do so, I perfer to nuke with a stealth tank guarding it)
