I do this whenever I drop off a beacon. It causes chaos and mayhem as the engineers are trying to diffuse, fight my stealth off, and get out of each others way. Where in your experiences, have you found this to be most effective? Right on top of it(possibly camouflaged by the beacon) or away a distance so the engineers HAVE to disarm it before they get near the beacon? [ January 14, 2003, 09:21: Message edited by: KIRBY098 ]
