quote:Originally posted by frijud:[QB]This is not so much a strategy than it is an observation. Tanks flee Engineers.[QB]Wholeheartedly agree. I personally will back up and kill the engineer from a distance, because I know darn well he has a timed c-4 ready to lob at the first sign of my moving forward. Now if there are 4-5, I will roll forward and kill them all at once so the other tanks don't have to be distracted with them, and I take it on the chin for the team.
