APC's are awesome on multiplayer practice. What you do is buy and engineer and an APC and load them up with people. Drive as fast as you can going in to the NOD base. Drive kinda by the door to the obilisk and go in leaving the APC blocking the door. Plant C4 on it and get back in the APC. Dont move from that spot and you can shoot the MCT from inside the APC. It will be destroyed very quickly so you can buy a Mammy to take out the whole base. A great order to destroy things is obilisk, turrets, weapons factory, refinery, and power plant. I like to leave the hand of nod for last so i can put an ion cannon beakon on it and watch it go down.
