quote:Originally posted by modemmack: you just won't be blowing up any buildings with it. Sometimes I host 1vs1 servers with my friends and we play. We decided to only use Flying Maps and to only use APC/Copter armed with a hotty.....needless to say my APC(GDI) took out his apache on many occasions and I eventually destroyed his Refinery by standing near the door and hitting the MCT(I think I was hitting it) blew it up semi fast with some c4 on it.....time ran out and I won by like 100 points.....close game tho
