In re the "all brains etc." level, I've run into an interesting problem. I've nearly got Moebius out, but I'm really low on life, so I went back a couple of saves to where we come out in the cavern with the bridge above. For some reason, when I get on the elevator this time, he won't come. I realize I can start the level over, but gee whiz . . . I've gone around and killed everything again, but no dice.
