
Subject: how do you know if someone is cheating?

I get the "you have an aimbot" thing allllllll the time. I think it's hilarious, because I kick thier asses with my 56k and mechanical mouse. They swear I'm cheating because they have a laser mouse and DSL. It's not the equipment kids, it's the operator. One motivated man with an M-1 Garand (WW1) can do more than an idiot with an M-16.
