You can educate n00bs but newbies can be saved! By posting tactics that work we in turn make the game play better. Tip: If your any type of troop in the enemy base and are about to die remember to throw your timed C4. Throw it one a enemy building or vechical. That way when you spawn in your base after dieing you might hear that "boink" noise. I use this tactic and almost always kill one or two enimies. I've killed 4 at once even.
