Well the enemy team on C&C_walls was in a situation kinda like this but they only had a PP left which is nothing to me, they had 16 out of the 20 people repairing the thing, so no outside attacks would be able to kill it, i happened to be a sniper, rushed in there got hit by a couple of mines then shot right down the row *each 'o' = a 2 or 3 heads**o*

--->'o"o"o"o'-->'o'---\.....=====.....'o"o"o'the diagram shows me (*o*) shooting then the bullet hitting the wall. and the ===== is that little barrier infront of the MCT
