Always fly your transport choppers as low as possible on Walls. Going higher DOES NOT make you safer from enemy fire. It only makes more of the enemy see you and try to stop you. Instead fly as low as possible, and take either the left or right path. Fly over the low part of the wall so you will be protected from most enemy fire and most enemy vision. If you get in at the right time, you can get to a building without being detected, with a load full of engies.
