Well, I guess I can shed a few... Complex - at the left entrance on both sides, there's a little hill you can snipe on. You'll probably take some damage from tiberium though. Walls_flying - on the hand of nod and WF for sure. It's even better if you use the lower class snipers (and logan) since they're a big chance they'll never see you. Also, getting on the pp and refinery is good as well. Canyon - in those towers behind refinery, a lot of people don't seem to notice people up there too often. I also say under the bridge in gdi's base is good for sniping, if you wait by ducking in the one part, you can also get a good amount of PT frags I also like sniping (as nod) on top of the barrax. City (both) - favorite overall spot in all maps, is classified sniping on the bridge has to be second, people on the ground don't seem to notice you a big portion of the time. Oh, and if you use the lower class snipers, you won't have to move as much. Exp. if your well hidden. [September 12, 2002, 17:59: Message edited by: generalfox]
