Quote:-Can't see the stealth units?... get skins which allow you to see the glow from the stealth unit when it get's hit from frendly fire or enemy fire... a neon blue hue works best as this will allow you to see it in both lit and unlit spaces on maps lolz i use skins all the time so i can see the enemie, rainbow colored stealth affect, all gdi vechs light blue, all nod vechs bright pink, all snipers changing rainbow colors, glowing mines, all sorts of stuff, it helps a lot. another thing i always do that is good is this: turn spawnies on, pickup several spawn weapons then go get a refil at a pt, all ammo will be full. also if you are a sniper, with a reg. sniper, pick up a siper rifle and it will give you to, with a total of 72 shots.
