Never, EVER get out of a stealth tank in the field. I watched some bozo start repairing his damaged(but still cloakable) tank at the mouth of the GDI base...before I could detonate it, a GDI engineer jumped in and ran his arse over.Even better: Do not EVER get out of your tank (unless you're an engineer and there's a beacon in your base). If there are friendly engineers nearby, let THEM do it. It's considered bad form to give one of only 8 tanks to the bad guys.
