I snipe all the time with SBH, I just find a spawn rifle, run back to base, do a quick E-5 and I have full ammo for the sniper rifle. Bet u guys didn't know you could do that with a spawn, eh. With an sbh, I snipe the enemy snipers in the back of the head (that makes for BEAUTIFUL screenshots). Once they're all exterminated, I snipe the enemy's base, and I try to snipe as many MRLS and aircraft as possible. Then when they get out to repair, because they see no one, I sneak up in stealth and peg them in the head and take the new ride back to base and donate to the team.
