please use this topic for helping ppl searching the forum for teamplay tactics, but all they get is angry messages to n00bs for teamplay: use the radiocommands one time, don't re-enter it when you don't hear anything, I often hear 5 times the same person saying the same thing. Use the radiocommands wise: do not say in canyon: 'attack the power plant', or say all the radiocommands in less than a minute to see if it works, a lot of ppl want to say something useful but nobody listens. In rushes, don't start it at the base: wait at their base until everyone is there, then attack
