Just buy a MRL and drive up the ramp on the left side of the wall(i dunno if thats called wall but it is near the entrance)...and you will arrive at the top of the 'wall'...just drive up to the center and you will see the enemy HoN through the hole of the hugh 'thing'(its the big 'ruin' in the middle where most sniper snip from) in the middle of the map...when you saw the HoN just use the alt fire of the MRL to get the enemy HoN...I found this 'tactic' when i was messing around the map with ThunderChicken. BTW, you can only do this tactic when you are on a server that does not lag like hell, you fall down from the ramp or wall if you lag. (ohh no...i dun really understand what im typing, my english suck)[May 17, 2002: Message edited by: psychobom]
