Id prefer to get an apc over a hummer. For 150 credits more you get 300 more armor, a heavier armor class, and the ability to carry 2 extra ppl all at the cost of a little less speed. Plus, the apc is a bigger threat psychologically to your opponents, as they will suspect that you are attempting an engineer rush and may start targetting you over you allies tanks, giving them a chance to take over the field.
