I found what I can say for now is an excellent sniper spot in city/city_flying. But I think WW put a barrier (couldn't tell, it could have easilly been lag after all) to keep people from using it. It's not by the polls of the sign either. Anyway, I've know that for some time. I was hiding there as Raveshaw and got some mean hits off several GDI vehicles till they finally wised up and found me.
