He's right. I played a game earlier today and it was awful. The game had 20 players in it and only 2 people were racking up points. 1st place had 3000s points and 2nd place had 2000s points. Everyone else had 0 points. The ping in the game was weird too. At one point, it would be running at 100s ping then the next minute, it's at 2000 pings. I could still run around and shoot but I could not inflict any damage on anything. All I can say is... it's a serious case of lagging.
