Do not waste your teams mines. THERE CAN BE ONLY 30 MINES PLACED BY YOUR TEAM. THIS INCLUDES REMOTE C-4. As most know, the only real way to protect your base from the SBH is mines. Therefore it's critical that 25 prox mines go into base defence. Let one person handle it. If you start throwing them randomly around the mines in critical spots will disappear and SBH are free to stroll in. Please leave explosives to the experts. If you don't know, don't use 'em.
