If you are GDI, and you are playing with a lot of people on both teams, all you need to do is get two engineers to go to the very far entrance at the beginning of the game and wait. Send the rest of the team to the front of the base out of range of the obelisk. Have the large group of people fire on infantry only so that the team can't get credits for just repairing the buildings you damage. Then send one engineer at a time into the base. If they are good and they duck behind the rock and wall, you can get inside the PP and blow it up.
