No, actually the game would be pretty \*\*\*\*ing exciting.No snipers, one use engineers, instant repair, lower costs, more cash, no \*\*\*\*\* sci fi weapons that are beyond TS/FS that don't belong in T even... hard ass recon bikes, Con Yard, bigger maps...No, no the game would have been much more enjoyable if it was hardcore C&C and not cartoon make believe \*\*\*\* so as to sell like crap.I'd rather still mod on the Littech engine, that \*\*\*\*er lets me make maps 3 times the size of Renegade maps.No, naw.. I'll play on the Q3 since all their games are much more along the lines of an FPS and not seeing how much you can damage a building or shoot a console with a beam of light.
