Mines on a vehicle doesn't only work as a powerfull weapon it also acts a steal protection from the other team.Say you are out on the battle field and you are the only tech out there and you have to get out to fix your last mammothtank then if somebody from the other team tries to steal your vehicle then the mines will explode and if they doesn't destroy your vehicle it will definitely cripple it so it will be easier to destoy.HATE CARTHEEVES!!!
