VOlcano, i killed hand within the first 5 mins of game with hotwire rush giving team a huge lead. then built med tanks and assulted base with everybody else. Also I was the one that allowed us to kill there last building bye going into it with a Patch and killing all the engysMap where u said I shot at buildings, they had 1 building left, we had no war, nothing else to do but shoot at hand (last building for nod) and kill inf since we were only up a few hundred pts. I had something like 25 kills and 3 deaths on that mapHourglass, my computer locked up 7 mins into the game when i was in 1ST place, I than did not get back in until 7 mins remaining and still finished top 5 on team in a total of 14 mins out of 30!!
