quote:Originally posted by AnarmEof1:I remember the day I first played Renegade Multiplayer Demo I tried to aim without the view locked to the turret. It was a living Hell trying to get engineers behind you. But, alas, I clicked the button at the main screen that says "Options" and changed the buttons and totally revamped the default controls. I am willing to bet that more than 40% of boarders use defaults as their controls. To name a few of my controls' evolutions, I use: arrows for moving forward, backward, and strafing; 0 on numpad for entering vehicles/using PT's; 1 on numpad for jumping, end for ducking; right shift for reloading; mouse wheel primarily for next weapon/previous weapon and secondarily for sniper zoom in and out; 1028x768x16 resolution etc. Anyone else dare to reveal their controls? [April 13, 2002: Message edited by: AnarmEof1] I use a nostromo speedpad 50. no worry about the keyboard with that... D-Pad: direction Mouse1: fire Mouse2: Jump Mouse3: alt fire mouse wheel: scroll waepn, sniper zoom use/enter : button 9 crouch: button 10 Reload: button 8 When the aircraft will be out: Up/down: Speedpad wheel with acceleration and all the stuff... This thing rocks!
