How many times have you saved up for that Nuke Beacon and Stealth Black Hand in the hopes of covertly taking the evil GDI Power Plant or Weapon Factory only to turn a corner in the tunnel and see ten GDI troops ready to light you up. Sure, you take out three, maybe four of them before you die, but still you die and the goal has not been met. Now with Kaneco's* new Helirush - you can clear those tunnels in no time. No more 1400 in wasted credits, no more long hikes to the GDI base. With Kaneco's* Helirush you outnumber them! That's right for only 19.95 you too can clean tunnels like nobody's business. Act now this is a limited offer. This product can not be found in stores. Click the following link for more information. Kaneco's Helirush* Kaneco is not affiliated with the Brotherhood of Nod.
