quote: an easier way is to place remotly detonated c4 or if your a good driver/its a small map, you can place timed c4 on it, the restocking yourself.Saves on the prox, and is just as effecient.I think that's what I was talking about....I meant plaicing remote c4 on your vehicle. Some people seem to have thought I was talking about proxy, which I wasn't. Placing Proxy on a vehicle seems to me to be a waste, and Timed c4 doesnt' seem to work as well. It will usually blow before I get to the destination. For this tactic, I think remote c4 is the only way to go.
