I agree with you about the beta-testers. They are acting like they are the ****. But I don't agree with you about Jedi Outcast. I like the game and I play it, but it is not as fun as Renegade and it is not based on skill. A light saber hit can be fairly lucky. Also the guns aren't well balanced and people can run around crushing people with that one yellow gun regardless if they have their sabers drawn or not. At least in Renegade, the weapons are set up correctly.
