On hourglass, as nod tech i bought a apc. 3 people came in, so we were 3 tech and 1 body guard. As the driver, i followed a flame tank. The flame tank attacked the AGT. All GDI defender came to destroy the f-tank. Serious mistake : in the meantime, I drove the apc near the undefended central With 3 tech the central was rapidly destroyed, the body guard died in the process(rest in peace you did ur job well), but we had time to repair the apc   and 3 of us returned safely to nod base Needless to say, we won this round.I loOove great teamwork action !
