LOL i know about using APC => i do that all the time... But - First APC is 500 not 400... - Second point, this difference (500 vs 300) make this plan his own interest : this is speed, and attack occur very earlier in the game. At 500 there are lot of hotwire roaming everywhere... At 300 + travel to gdi base, may be there are some but not sure. - Third point : two engys cannot defend themselves. A chem had a little chance to defend the engy against infantry and then attack efficiently the building too. (Notice this make the tread keep his chem subject) The chem can also attack the incoming repairers.- Fourth point if someone got 500 to buy an APC, why the others don't take tech and/or BH ? Just taking engy is stupid at this step of the game... - Fifth point if u buy an APC why to go in GDI base with only two people ???- Sixth point, i've seen someone taking out the AGT with buggy & 2 engy, but I think that Chem + engy is more efficient because they r complementary (see point 3).
