general then i have a question?is it just a feel of the game or do you have something specific you do like a key command that may not be in the control menu?like i know that hitting a & w will make you go foward and sideways at the same time are people not using a mouse and keyboard? if i had one of those hand held control paddles for sega nintendo playstation it would be easy to jump around like that and avoid things thats why i am asking for what it is that YOU do that makes it easier for you to play good   people shouldn't think their strats or moves should be kept secrets because if other players know them, then it just means the game play gets better!! and better more challanging games!! so come people what do you do to get the good shot, out run the tank, jump into and through enemy defenses?
