alot of times what gdi has to do to prevent a f rush or stup one is so rediculous that it is almost impossible. also the mammoth isnt good enough. yes teams can make the dif but in cases where teams are even nod does have a rather good advantage in the flame being so good, stealth plus becon and in the fact that the mammoth cost more than a coledge education and is a crappy and not so powerful shot. nod can flame rush alot but gdi mammoths are so expensive that u get about 1 shot at a mammoth rush which doesnt work so well, also mendosas are good agianst mammoths so u so slow they screw u before u in range of the super oblisc and 2! cannons
