now i must say that i had the same problem but now i know the answer, and better im gonna tell it to you! the first mane is at the top back of the ship, at the sub you see red keycard doors, just run from the opposite direction of these doors and run as high you can and when you find him, he got guards. and lots of 'em, its chem soliders so watch out, (i shot 'em with pistol and sniper. and when you kill him, go to bottom of ship and go as long you can to the other side of the ship. and then just go up and you find the captain. And by the way, the prison is in the middle elevator in the engine room. (middle floor)[ March 30, 2002: Message edited by: OllBollen ]
