ok...math lesson. enemy harvester + you as soldier in path of or on top of = boink. Or This is you. This is you on the enemy harvester. BOINK. Any questions? Don't get me wrong, I'd love to be able to ride on top enemy vehicle right into their base, think it'd be funny as hell! - specially if tank was low on health and obelisk mistook for enemy because of my presence and blasted it.
