and newbies do tend to ruin them for sure. it takes some one that knows how to use one to make them work. i can't count the times i've seen stealths engaged in major tank battles from the enemy's front and get toasted. don't use them that way! if you can't get around and behind the enemy with one, then you'll have to wait for an opportunity arises before you slip out. if your base is being sieged, don't buy one. you'd do better to get a flamer or light tank so you can engage the enemy, or if there are already lots of tanks on your side, get an engie and help heal the tanks..
