I've found the middle road to be best in this regard. It is certainly a good idea to mine the door and inside of the AGT and Obelisk, but, I agree that mining the MCT, or rather, NEAR the mct works better than the doorways. Just be sure to space them a ways away from it, in a semi-circle. You have to make sure engie's can't get near enough to throw them. But, done properly, you can set up a good perimeter around the mct that can keep it safe. Or, just park a **** humvee in front of it. It's what all the kids are doing
