quote:actually that aint 100\% true, i find it that if i face a vechile i go with the tank's shells but if there is a person around the rockets r much easier to kill them with, try it the rockets dont damage armord cars much, like the harvester, it will barley scratch it with missils, there really effective against ppl, remember:shells = tanksrockets = infantry one other thing. the rockets are better vs. buildings than the main gun. i tested that and it takes less shots with the missiles..
