Yes, there are a few SSMs there but not in this spot. This spot is right next to the Airstrip tower. It's a few feet to the right of the tower if you are facing the wall. I thought it was lagging, which is why I drove my hummer far away as possible and took snapshots from many different angles. Also, this looks too big to be a SSM. I'm hoping it has something to do with a secret mission or something. Maybe we have to accomplish specific tasks to open a doorway to a secret mission? Perhaps, you have to hold specific keys before approaching the target. I remember C&C:Tiberium Dawn... C&C.EXE FUNPARK would get you the secret dinosaur mission. Hold ALT when pressing on the right speaker in Red Alert gets you the secret giant ant missions. I hope this is related. I've already contacted WW and they haven't replied... isn't that odd?
