The game must be unladdered! Oh, and it works in multi practice too. When you start the game, or at any point in it, you push ~ or F8, and type in "extras fnkqrrm" (without the quotations)! Then once you've entered a PT terminal, hold down your left ALT button, and click on either the character button or the vehicles button (while holding down the ALT). And voila! You should have the extra skins at your disposal! Peace
