I agree with those who say you can cheat in single player, it is none of our business. As I have read in a post before... Im sorry, I don't remember the post name or who posted it... but I'll try to make this as accurate as possible.-Think about someone who has no patience. They are playing singleplayer, and they die. They slam down their mouse, and pound their keyboard with frustration.-Youve gotta feel some sympathy for those guys. HOWEVER; CHEATING OR USING TRAINERS IN MULTIPLAYER IS ABSOLUTELY UNACCEPTABLE! Cheating takes away all fun, and is totally unfair to the people with real skill. Nobody is crappy enough that they have to use a cheat for multiplayer. You are a one target out of 16, which lowers your odds of death slightly. Alternative to cheating-PRACTICE! [March 22, 2002: Message edited by: UltraMoron]
