Mammoth need at least 2 ingi to keep it alive, but since it's big, the mammoth is a good cover for them, they dont have to fear snipers as much as ingi repairing mlrs or med do. Also, a mammoth alone worths nothing. When NOD sees a mammoth, it's the same reaction as when GDI sees a flame tank. They put all they got to destroy it. they don't do that with med since they are less dangerous than mammoth. But a well coordinated attack of 3 mammoth and 4 ingi backing is almos unstoppable by any non coordinated team. Try it! you'll see!
