My most embarrassing tactic is about C4 too. I was on the Nod and winning with the Hand destroyed. I went as a flame thrower and charged towards the GDI war factory. There is two flame tank flaming it but the health does not seem to go down. One entrance is heavily mined so I went in the other door. I found six eng 1 hotwire 1 prototype and 2 Havoc guarding and repairing MCT. I dropped the C4 right between the eng and starting to flame them because I thought that I will never go out. I got killed by 2 shot and ion cannon hitting me at sametime about 1 sec after I started flaming. I respawned and went to the tunnel as a Nod soldier, when I just reached the war factory and thinking the C4 must be disarmed then a explosion inside the War fact and Boink. Six guys got killed then the war fact got blown up.
