i once killed a very stupid mobius with 4 shots to the head as a basic engineer from 5 feet behind him very stupid. personally i do better on infiltration i get in plant a nuke were no one can find it put C4 next to the beakon and leave without taking a single shot.btw for you people who dont know this when you plant a beakon try and find a spot on the outside of a building or a very well concealed spot (refinery is my favorite) plant C4 first then your nuke, any engie or guy near will die giving you about 5-10 extra seconds out of 20 beakons i have planted 3 have been succesfully disarmed
