I have recently been playing Renegade and have seen many people strafing. I asked a lot of people and they say to strafe to stay alive, but i find this method hard to keep the cursor on the enemies head. So i ask my self, strafe or crouch? Also I have seen Gunner's devastating power against infantry and tanks alike, but if I'm haveing a good day and i hit everyone on the head with the officer, I do very well also. So once again gunner or officer.
