quote:Originally posted by ekin:The fastest way is to buy a buggy (nod) or a hummve and a rocket soldier. These vehicles are to fast for the GDI tower to aim, and even if you loose the vehicle you still can manage to run into the building and set some C4 or use the rockets to blow the console in the building.What old beta version are you playing? A buggy or humvee cant get past ethier of the base defences without going byebye. Unless your cheating its impossible(ive tried in multiplayer pratice and keep on dying).
