quote:Originally posted by Spiff:And just how does one do this?If you get out anywhere within range of the guard tower you get shot.If you drive to a secluded corner you've most likely got a tank or other offensive GDI soldier following you.There's probably proximity mines around which you can't disarm.If you start planting the beacon you'll be killed by the guy who was following you. Or are you talking about destroying an undefended base? WE all know how to do that.i find it easier to kill the AGT as Nodif you drive an APC into base its almost guaranteed that your APC wont go down (by the time it takes to get to the AGT)that is, unless there are tanks pelting you AS you go in anyway, two shots from the obselik will kill the APC so i think the post about GDI being good against infantry and Nod being good against tanks somewhat truehowever, the only way for GDI infantry to successfully infiltrate the Nod base is in numbers, cuz i cant seem to get near the obselik by myself on foot
