I can run into the nod base and get into either the hand of NOD or the power plant as a hotwire. It's not that difficult from the far tunnel as long as you don't run into mines. But how do you get into the GDI base? i've tried using stealth black hands and techs because they have high armor. I run through the furthest tunnel towards the back of the barracks. I always get killed. How can it be done? Nod relies on infantry so Gdi has a good infantry defense (AGT). Gdi relies on tanks so Nod has good anti-tank defense (Obelisk). The trick

resist the AGT long enough to flame it down. Or else use a light tank which is fast enough to dodge the rockets and get hit only by the machine guns. There is no way to get into a Gdi base alive with one infantry unit as there is no way to get into a Nod base with one tank. (Except humvee and apc but their machinegun is useless against buildings) The reason why it's easier to destroy a Nod

Nod DEFEND AGAINST INFANTRY! They are the real danger to a Nod base
