I find the best defence early on is the Granadier(GDI) or Flamethrower(NOD). I stand up on the the ramp above the tunnel and wait for the dummies to come running out...You be surprised how many people don't look behind them. Boink! When the game gets a little longer get Sydney...and you can join the fight against any vehicles or go offensive.[March 12, 2002: Message edited by: SystemX]
